

FitBuddy – AI Fitness Plan Generator

HTML, CSS, and Jinja2 Template Skills

Reference: W3Schools HTML/CSS/Jinja2 Tutorials

Prerequisite Details

- HTML is used to structure the FitBuddy user interface.
- CSS is used to style the pages and provide responsive layouts.
- Jinja2 is used to dynamically display backend data inside HTML templates.
- The project uses templates such as index.html, result.html, and all_users.html.

This PDF is based on the prerequisite section of the supplied FitBuddy project documentation. It does not add requirements that are not stated in that source.
