

FitBuddy – AI Fitness Plan Generator

SQLAlchemy and SQLite Basics

Reference: SQLAlchemy Docs

Prerequisite Details

- SQLAlchemy is used as the ORM for FitBuddy database operations.
- SQLite provides persistent local database storage.
- The database stores user information and generated workout plans.
- Feedback-based updates preserve the original and updated workout plans.

This PDF is based on the prerequisite section of the supplied FitBuddy project documentation. It does not add requirements that are not stated in that source.
