

FitBuddy – AI Fitness Plan Generator

Python Programming Proficiency

Reference: Python Official Docs

Prerequisite Details

- Python is the main programming language for the FitBuddy application.
- Python is used for FastAPI routes, application logic, database operations, and Gemini integration.
- Basic understanding of functions, modules, variables, classes, exceptions, and packages is useful.
- Python proficiency supports development and debugging of the complete backend.

This PDF is based on the prerequisite section of the supplied FitBuddy project documentation. It does not add requirements that are not stated in that source.
