

FitBuddy – AI Fitness Plan Generator

Environment Setup

Reference: Virtualenv Guide

Prerequisite Details

- Understand Python package installation using pip.
- Understand how to create and activate a virtual environment.
- The FitBuddy documentation provides a virtual-environment workflow before installing dependencies.
- A virtual environment keeps project dependencies isolated from other Python projects.
- The project dependencies include FastAPI, Uvicorn, Jinja2, SQLAlchemy, python-multipart, and the Google Generative AI SDK.

This PDF is based on the prerequisite section of the supplied FitBuddy project documentation. It does not add requirements that are not stated in that source.
