

FitBuddy – AI Fitness Plan Generator

Uvicorn ASGI Server

Reference: Uvicorn Documentation

Prerequisite Details

- Uvicorn is used to run the FastAPI application locally.
- Understand the basic Uvicorn command used to start the development server.
- The supplied project documentation uses a reload-enabled development server.
- The application can then be accessed through the local browser and FastAPI interactive API documentation.

This PDF is based on the prerequisite section of the supplied FitBuddy project documentation. It does not add requirements that are not stated in that source.
